ONE VISION, ONE LEGACY

American Standard was formed after an amalgamation of two industry leaders in their own rights – American Radiator and Standard Sanitary.

Since its inception in 1875, Standard Sanitary has pioneered many plumbing product improvements including enameled bathtubs, toilets, sinks, electric dishwashers, even adding color to bathroom fixtures. By 1930's, Standard Sanitary was leading the sanitation and plumbing industry.

American Radiator, on the other hand, dominated the heating equipment market and was the largest supplier of heating equipment in the world.

In late 1929, the combination of both the entrepreneurial flair of American Radiator and innovative spirit of Standard Sanitary laid the foundation for what American Standard stands for today.

JOHN PIERCE

FOUNDER

The roots of American Standard's innovation legacy can be traced back to a tiny tinware shop in Ware, Massachusetts, where John B. Pierce, an optimistic entrepreneur, purchased a tinware shop for $2800 in 1872. With determination, a fresh coat of paint and an unwavering vision for the future, Pierce forged the beginning of a proud legacy that has made American Standard one of the most enduring and trusted brands in the industry. Since its humble beginnings, American Standard has led a pivotal role in redefining today's bathrooms by pioneering innovations - making modern bathrooms accessible to all.

DEFINING MOMENTS, REWRITING HISTORIES

1870's

Rise of Public Health

The advancement of sanitation has been important in the history of public health. In 1875, James Arnott and Francis J. Torrance from Ireland founded Standard Manufacturing to make cast-iron water closets, washstands and bathtubs for the growing sanitation and indoor bathroom market.

Clarence Mott Woolley, forms American Radiator Company in 1892.

John Pierce purchases tinwork shop in Massachusetts in 1872. Forms Standard Sanitary in 1899.

AMERICAN RADIATORS

1890's

The Growth of The Modern Bathroom

Alongside Standard Manufacturing, two companies producing enameled sanitary products were growing steadily. The first was Dawes & Myler Manufacturing which was founded by ex- Standard Manufacturing staff, Edward L. Dawes and William A. Myler. The other was Ahrens & Ott Manufacturing, set up by Theodore Ahrens and Henry L. Ott. In 1899, all three companies merged to form Standard Sanitary that led the expansion of the bathroom market and made modern bathrooms accessible to all.

Standard Sanitary

1900's

Cornering The Market

By 1900, Standard Sanitary had become the world's largest supplier of plumbing goods; producing more than 150 bathtubs per day. American bathroom was modernizing with the country devoting resources to public sewage and bathrooms began moving indoors rapidly.

Standard Sanitary's "Royal Albion"

"Standard" PLUMBING FIXTURES

The Sanitary Advantage

In 1883, Standard Manufacturing perfected a process to coat pulverized enamel onto hot castings to form a smooth, white surface that was easy-to-clean and impervious to water— preventing corrosion and bacteria from forming and multiplying on the sides of metal tubs.

1880's

John C.Reed developed a process he patented to enamel tubs quickly and helped Standard Sanitary rise as the nation's plumbing leader.

1910's

Expanding The Product Line

In 1913, American Sanitary purchased the Great Western Pottery Company and began producing enameled porcelain products. The company began selling a complete line of cast-iron enameled kitchen sinks in 1917 after a successful launch at the Pittsburgh Annual Exposition.

1930's

Mega Merger Forms One-Stop Shop

While Standard Sanitary dominated the sanitation and plumbing industry, American Radiator, led by Charles Woolley, was the world's largest supplier of heating equipment. In late 1929, both companies merged to form American Radiator & Standard Sanitary Corporation; creating a single source for craftsmen and driving greater demand for heating and plumbing products.

AMERICAN RADIATOR & Standard Sanitary CORPORATION

Supporting The War Effort

By 1943, American Radiator & Standard Sanitary virtually halted all peacetime production to supply the armed forces with critical parts and munitions including the mold and castings for the B-29 Superfortress bomber. By war's end, the company had produced more than 2.5 million hand grenades and 75 million cast-iron nose pieces for bombs. A shortage of labor and materials in the post war years forced the company to put products on allocation as demand far outpaced available production.

1940's

American Radiator & Standard Sanitary advertised hope during wartime production.

The Bathroom Comes of Age

White has been the color of choice in American bathrooms. It was clean, bright and sanitary. But in 1926, color made its first appearance in bathroom fixtures from Standard Sanitary. Suddenly style entered the bathroom with a new attitude that made it an integral part of home décor.

1920's

Peacetime Boom

The housing industry recovered quickly after WWII as affordable housing was required for millions of returning war veterans. The new suburbia was born, and with it the expansion of plumbing products. In 1951, American Standard had moved into the kitchen; introducing steel sinks, steel walls, base and specialty cabinets, automatic dishwashers and electric food waste disposers.

1950's

Popular enameled steel kitchen sink with integrated food disposal system.

AMERICAN-STANDARD

Turbulent Times

By 1971, American Standard sales reached $1.4 billion with 70,000 employees. Despite a turbulent economy that led to a decade of controlled growth and expansion, the company grew worldwide. By 1979, it was operating in more than 20 countries and claimed the title as the world's largest plumbing manufacturer.

1970's

Refurbished Radiator Building

The Go-Go Days

By the eighties, sales reached a record high of $2.7 billion and innovation continued to drive market leadership. The company introduced Americast® in 1987, a game changing material that was lighter than cast-iron and more durable than enameled steel, and the Sensorium, the first tub with electronics that controlled in-home appliances.

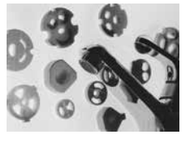
1980's

Made of three layers, enamel, metal and composite backing, this is no ordinary tub. Americast® is lighter than cast-iron and just as strong, making tub installation easier.

New Products For a Modern World

The sixties was a growth era for American Standard. The company expanded its product offerings, and ventured into new markets and technologies. Innovations included the now ubiquitous "push and pull" faucets, slip-resistant bathtubs, odor-removing Vent-Away toilet systems and remote control drain pop-ups. In 1968, a technological breakthrough in ceramic dish valves was added to American Standard faucets – promising leak-free operation for life.

1960's



Years of trouble-free performance were made possible through American Standard's patented ceramic-disc technology and washerless faucets.

We Want You to Love Your Bathroom

Americans turned their attention to creating stylized living spaces that offered a sense of comfort, retreat and relaxation. American Standard joined the renaissance by acquiring Porcher, a French-based luxury brand and a German-based faucet brand called JADO. In addition, new suites and product lines were added to attract style-minded consumers.

1990's

TODAY

Fresh Ideas For a New Generation

In 2013, American Standard joined the LIXIL Group of Japan, one of the world's leading building products companies. With annual revenues exceeding $16 billion, LIXIL is a family of brands with leading market position in windows, doors, exterior curtain walls, and of course kitchen and bathroom products.

LIXIL
Link to Good Living

Clean is the New Green

Innovation is our top priority at American Standard. Our latest introductions bring new levels of style and performance to our customers and continue to raise the standard of comfortable, beautiful, healthy and convenient living.

DOUBLE VORTEX
Maximum flushing performance, minimum water usage

PROGUARD
Guards against water stains

ECO HANDLE FAUCETS
Provides up to 30% energy savings

ANTIBACTERIAL FINISH
Total hygiene protection

CLICK TECHNOLOGY
Prevents water wastage

2000's

Creation of American Standard Brands

American Standard Companies, Inc., the parent company of American Standard announces break up. In 2007, Bain Capital purchased American Standard Global Bath and Kitchen business while Sun Capital bought over American Standard Americas, which led to the creation of American Standard Brands that included the integration of Elijer, Crane Plumbing and Fiat, all Sun Capital companies.

BATHROOM SOLUTIONS

American Standard has led the way in developing innovative sanitary products and continues to do so. It is this tradition of quality and innovation that spearheads the intelligence behind every American Standard offering.

Whether it is a practical functionality for drip-free performance or a technological advancement that guards against water stains, every detail continues to be the driving force in American Standard. Our main focus is to bring more and more benefits to elevate a bathroom user experience.

RAISED HEIGHT
Easy to get on and off, especially for the elderly, pregnant and disabled

PROGUARD
Guards against water stains

COMFORT PUSH BUTTON
A larger surface area for ease of use

SKIRTED DESIGN
Premium design allows for quick and easy exterior cleaning

DOUBLE VORTEX
Maximum flushing performance, minimum water usage

SOFT CLOSING SEAT & COVER
Gentle and quiet closing action

RIMLESS
Hygienic and easy to clean

EASY LIFT
Unique lever design for lifting the seat cover easily

TOP FIXED & QUICK RELEASE
Easy removal for thorough cleaning

SUPER SERENE
Provides a quiet flush

DUAL FLAPPER
Powerful flushing with minimal noise

ANTI-BREAKAGE
High impact-resistant seat & cover designed for durability

ANTI BACTERIAL FINISH*
Hygiene protection for the family

ANTIMICROBIAL PROTECTION
Protection against stains and odors

WATER SAVING
Water-saving for ecological and economical sense

LINE SENSOR
Unmatched sensor precision compared to a conventional sensor faucet

LOW LEAD FAUCETS
Minimal lead traces in faucet waterways

ECO HANDLE FAUCETS
Provides up to 30% energy savings

ADJUSTABLE AERATOR
Provides an adjustable aerated water stream

CLICK TECHNOLOGY
A midway resistance when lifting the lever provides better water volume control and saves you water

SWIVEL HOSE CONNECTOR
Prevents shower hose from entangling

SMART LIMESCALE CLEANING
Resists limescale build up for easy cleaning

AIRNERGIZE TECHNOLOGY
Less water, luxurious shower performance

PATENTED CERAMIC DISC VALVE TECHNOLOGY
Drip-free faucets with smooth handle performance for a lifetime

TOUGH & DURABLE
- Each ceramic cartridge is tested to operate over 0.5 million on/off cycles for worry-free performance.
- Provides resistance from corrosion

**Applicable to the push button, seat and cover of Acacia Evolution collection.*

CLEAN IS THE NEW GREEN

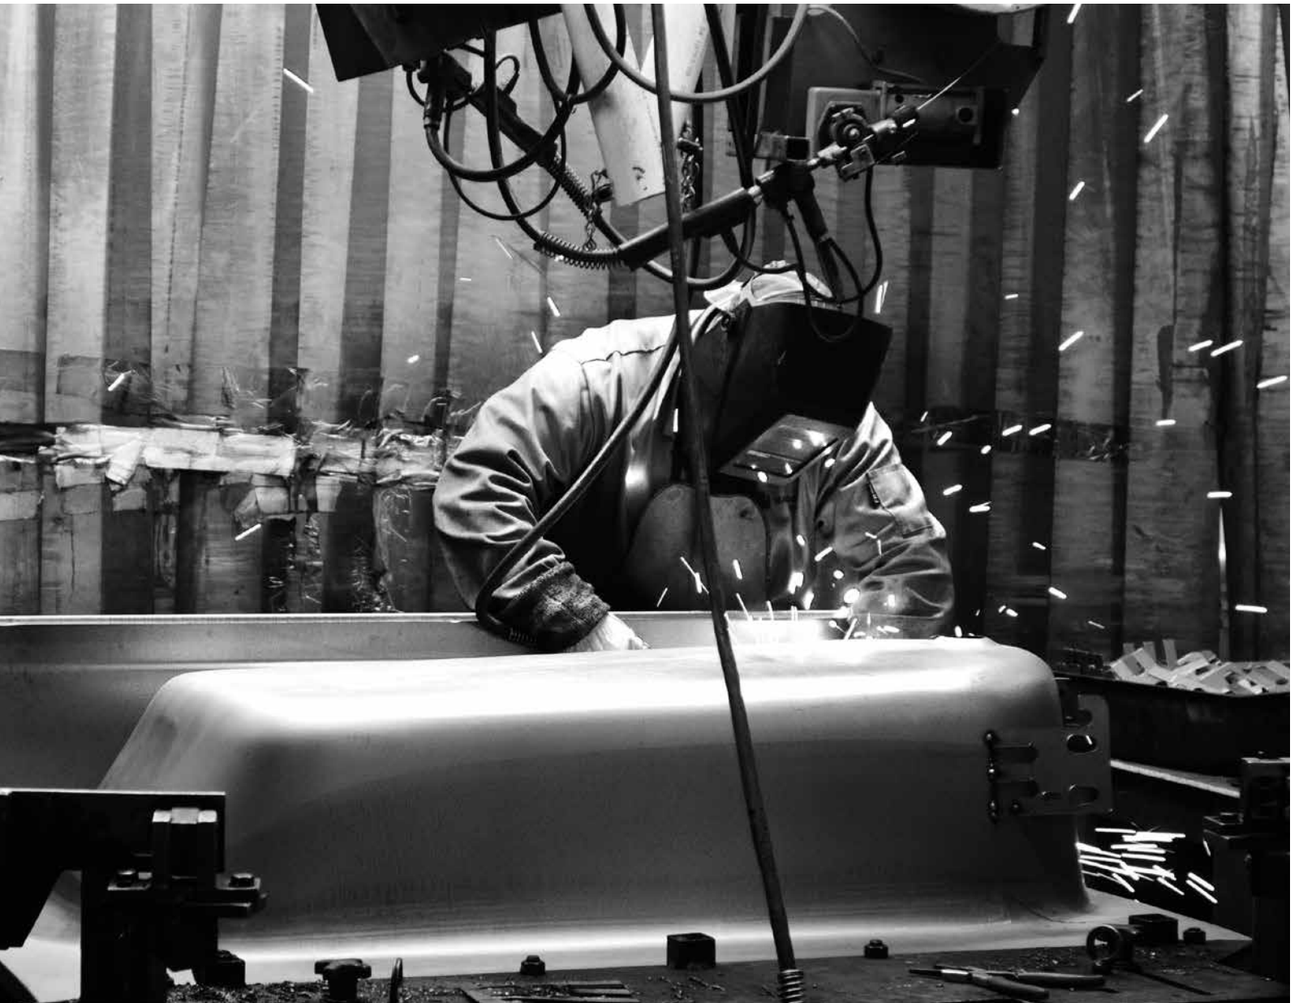
‘Green’ is more than an aspiration at American Standard. Our green efforts are evident in the clean technologies that we place in our products. Each thoughtful innovation is committed to safeguarding our planet.

The problem of water scarcity is a growing one as the world’s population puts mounting demands on limited supplies. Never has it been more pressing to introduce clean technologies that will ensure an ecological balance. By reducing water consumption, minimizing the use of harmful detergents and cutting down on energy use, American Standard products aim to protect our precious planet, so that our future generations are assured of a clean and green environment.

QUANTITATIVE RESEARCH, QUALITY ASSURED

No other single factor in the history of public health is as important as the advancement of sanitation.

At a time when people were first bathing in metal tubs, American Standard perfected a process to coat pulverized enamel onto hot castings, creating an impervious surface that prevented corrosion and bacteria from forming on the metal tubs. This quickly elevated the company to a plumbing leader status.



We also introduced color into bathroom fixtures when white was the norm in American bathrooms, creating stylish plumbing fixtures fit for conversations.

Decades of research go into every single American Standard innovation. From our ubiquitous “push and pull” faucets which offered easier “one-hand” operation, skid-resistant bathtub for better safety, wall-mounted toilets designed to make cleaning under the toilet easier, to our patented breakthrough ceramic disc valve technology for leak-free faucet operations, we have earned the trust of our customers for over a century.

Today, we continue to innovate, introducing energy-saving Eco-handle faucets, water-saving Airnergize showers, powerful Double Vortex flushing, and stain-resistant Proguard technology.

With worldwide presence in over 20 countries, manufacturing and research facilities in Asia and a strong design team, we make it our business to deliver peace of mind to ensure reliable performance every time, anywhere.

DRIVEN BY DESIGN, POWERED BY TECHNOLOGY.

American Standard's dynamic accolade-laden team of in-house designers create award-winning designs, providing offerings that provide not just pleasing aesthetics, but also human-centric functionality.

LYRIC SHOWERHEAD

Enjoy a shower with LYRIC - a multi-function music shower head that takes your showering experience to an auditory level.

The speaker resides outside the water source, providing you with increased audio clarity and can be easily removed to be used indoors and outdoors up to 32 feet away.

reddot design award 2014

ACACIA EVOLUTION BASIN MIXER

Unlike conventional mixers, Acacia Evolution's Eco Handle releases cold water instead of warm water upon lifting the lever, saving up to 30% energy.

The faucet is also equipped with Click Technology - a midway resistance upon lifting the lever that gives you better water volume control and thus saving precious water.

BATHROOM COLLECTIONS

CLASSIC, CONTEMPORARY, MODERN

The bathroom has come of age. From being a mere functional cleansing room, it has evolved into a private haven for the individual. Our Bathroom Collections enable individuals to express their personalities and create their own private sanctuaries.

Classic

With a preference for conservative aesthetics, Classic collections embrace ‘established design’, quality and elegance. With a healthy respect for tradition and formality, emphasis is often placed on style-longevity.

Contemporary

Robust materials and humanized aesthetics combine to provide simple, valuable solutions for everyday needs. With this style, there is a distinct practicality with a penchant for harmonious design.

Modern

This style amplifies simplicity and clarity, with no need for exaggeration or excessiveness. Intuitive products that are just as easy to use as they are emotionally designed with the latest trends in mind.

From modern and contemporary, to timeless classic designs, you can be sure to find your personalized style at American Standard.

LuXus

Collection

All comes from the inspiration of extravagant lifestyle. We create LuXus by the combination of innovative design and high-end technology. American Standard redefines the posibilities of humanity and high-tech, in order to create unparalleled design masterpiece. LuXus contains infinite imagination for luxury lifestyle.

Acacia Evolution

Collection

Evolution itself is in a constant state of change, morphing into more relevant form to adapt to time and space. After a decade of enduring and celebrated success from its Acacia predecessor, Acacia Evolution marks the dawn of a new era. In a time where technology defines the way we interact, work and live, Acacia Evolution is designed to meet these needs. Where design and technology co-exist symbiotically, blurring the lines of form and function.

Tonic

Collection

Awarded the Red Dot Design Award, Tonic's beautiful design is compatible with any style of decor. Its contemporary elegance is matched with simple Scandinavian style. With the ergonomic curves of the faucet handles, an intuitive human-centric connection is forged with the user.

reddot design award

ACHIM POHL & TOMAS FIEGL

Our Tonic, Moments & IDS Collections earned these famous designers the prestigious Red Dot Product Design Award. The duo aim to create products that are 'part of a whole'. This means creating designs that are well balanced between form and function, transcending cultural boundaries to be appreciated by all.

Town Square

Collection

Luxurious charm and eternal elegance comes from the beauty of the appearance, while the everlasting pride and joy comes from the flawless combination of large spaces and fine details. The neat lines define the unique and elegant Town Square collection, delivering its special style and timeless beauty of space. The collection introduces neo-classic furnishings to modern bathrooms to create an elegant and nostalgic feel. It includes the whole suite of specially designed auxiliary products to fully present the modern classical aesthetics.

Designed by Gray Uhl. Gray Uhl is in charge of new product design for American Standard's Northern America market. He has designed many innovative bathroom products for American Standard among, many of which have won international awards and gained a reputation over the last 20 years. Being an active member of many top design organizations, Gray is often invited to speak at interior design and bathroom design workshops. He creates timelessly attractive products that are simple yet sensual.

TOILETS & WASHBASINS EXCELLENCE

It is usually the right ceramic choice that will bring out the best in your chosen faucets. This is why we have a comprehensive range of washbasins that will suit every individual style, yet offering the same level of comfort that you deserve. Special attention has gone into every ceramic piece - from ergonomically designed bowls with powerful flushing to low maintenance, space-saving basins for intimate sized bathrooms, we are confident you will find a favorite for your private enclave.

INTEGRATED TOILETS

ACACIA EVOLUTION INTEGRATED TOILET

Inspired by form and simplicity, Acacia Evolution's integrated toilet is elegantly sculptured. This deluxe one-piece toilet is designed with a combination of ergonomic principals and glamorous form. With curves that contour perfectly to your body and technologically equipped with revolutionary enhancements to provide the ultimate in comfort and hygiene.

The Acacia Evolution includes one-piece toilet seat and fully combines innovation with classic design elements, bringing you a brand new toilet seat that integrates rich functionality with a natural, simple exterior. Advanced technology, which immediately provides hot water, creates a more personal and comfortable experience. What's more, the convenience of science allows you to enjoy a quality lifestyle that is both classic and natural.

Instant Heating

American Standard shower toilet takes the lead to adopt instant heating technology to secure long-time thermostatic washing healthier and cleaner.

Dual Nozzle Cleaning

The design of dual nozzles targets at different clean parts; air-in water flow specially improves the feminine cleaning experience, providing you ultimate comfort and comprehensive cleaning.

Antibacterial Material

The nozzle, toilet seat, toilet cover and the remote control panel adopt antibacterial materials, which is more healthy and cleaner.

Energy-saving

3.5L and 5L siphon jet flush saves more water.

E-bidet

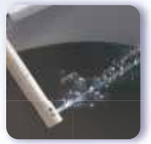
E-Clean e-bidet

More comfortable hygienic experience, more reassuring healthy enjoyment.

The antibacterial resin in American Standard's e-clean smart electronic toilet seat top brings all-round improvements in cleaning and safety; equipped with multiple convenient and comfortable user-friendly designs, they reinterpret the care that comes with smart technology, providing you with unprecedented hygiene and helping you to care for every member of your family.

Dual nozzle design

Dual nozzles meet different cleaning needs including posterior and feminine cleaning, avoiding cross infection and securing the hygiene.



Air bubble soft cleaning for female use

Large quantity of soft bubbles are mixed in the cleaning water stream, providing gentle and careful wash for women.

All-round antibacterial protection

The nozzle,toilet seat,toilet cover and remote-controlled panel are all made using an antibacterial resin, helping to prevent the growth of bacteria and keep your family healthy.

Quick-detach cover

Quick-detach cover makes it easy for day-to-day cleaning, avoiding the appearance of dirty spots.

Ergonomic toilet seat for human body

The toilet seat combines convex and concave sides and adopts user-friendly design, providing you the comfort and easiness even if you sit on it for a long time.

The auto-clean nozzle

The nozzle cleans itself automatically before and after usage to avoid the secondary contamination, making sure you can use the toilet safely.

Seat heating automatically turns off

The seat heating function automatically turns off when the user sits on it, saving power effectively; meanwhile, it can also prevent cryogenic burns and skin discomfort caused by over-heating.

Strong compatibility (Griffin e-bidet only)

The centre of the wide fixing hole is 136 – 210mm, improving compatibility with the electronic seat top and side panelling.

Massage–clean (Griffin e-bidet only)

The new massage-clean function provides variable shower pressure.Makes showering more enjoyable than ever before.

Note:
★★★ Perfect match: E-clean can completely cover the ceramic with the gap between the rings within 10mm; the seat can be lifted and kept still instead of falling down at an angle no smaller than 98 degrees; the nozzle can stretch out and pull back without touching the ceramic.

★★ Fair match: E-clean can completely cover the ceramic with the gap between the rings between 10mm to 15mm; the seat can be lifted and kept still instead of falling down at an angle no smaller than 98 degrees; the nozzle can stretch out and pull back without touching the ceramic.

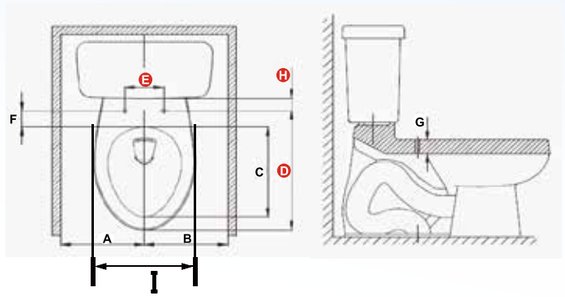
★ Basic match: E-clean can completely cover the ceramic with the gap between the rings more than 15mm; the seat can be lifted and kept still instead of falling down at an angle no smaller than 98 degrees; the nozzle can stretch out and pull back without touching the ceramic.

E-bidet

E-Clean e-bidet

e-洁 e-Clean Tips for installation

1 **Please confirm the dimensions of your toilet and its surroundings before installation.**



2 **Installing the bathroom power socket**

Note: Please set up the waterproof socket in advance according to the following instructions.

- The power line of the **Griffin E-bidet** and the **RY E-bidet** is 1 meter long. The power line of the **New Sooth Electronic Warm-water Cleaning Seat & Cover** is 1.5 meter-long. Position the socket so that it is within reach of the power wire and make sure it is above the floor, where it won't get wet.
- Please arrange the power socket according to the relevant national provisions.
- For your safety, we suggest that a power socket with an RCD (Residual Current Device) or insulating transformer is installed.
- The power socket has to be three-way and earthed.

- Griffin E-bidet Warm-water Cleaning Seat & Cover
  AC voltage: 220V 50Hz
  Maximum rated power: 336W
- New sooth Electronic Warm-water Cleaning Seat & Cover
  AC voltage: 220V 50Hz
  Maximum rated power: 650W
- Electronic Warm-water Cleaning Seat & Cover
  AC voltage: 220V 50Hz
  Maximum rated power: 305W

FLUSHING TECHNOLOGY

Raising the **Flushing Standard**

Powered by

DOUBLE VORTEX

2.6/4L

Maximum Flushing Performance, Minimum Water Usage

The design of the bowl propels the water forward and creates a strong flushing momentum.

DUAL FLAPPER

Powerful Flushing with Minimal Noise

The Dual Flapper generates excellent siphon effects resulting in a powerful flushing performance. In addition to providing a rim-clean wash solution, the dual flapper is extremely quiet when compared to the normal siphon flush.

**Only for IDS Clear one-piece toilet*

SIPHONMAX

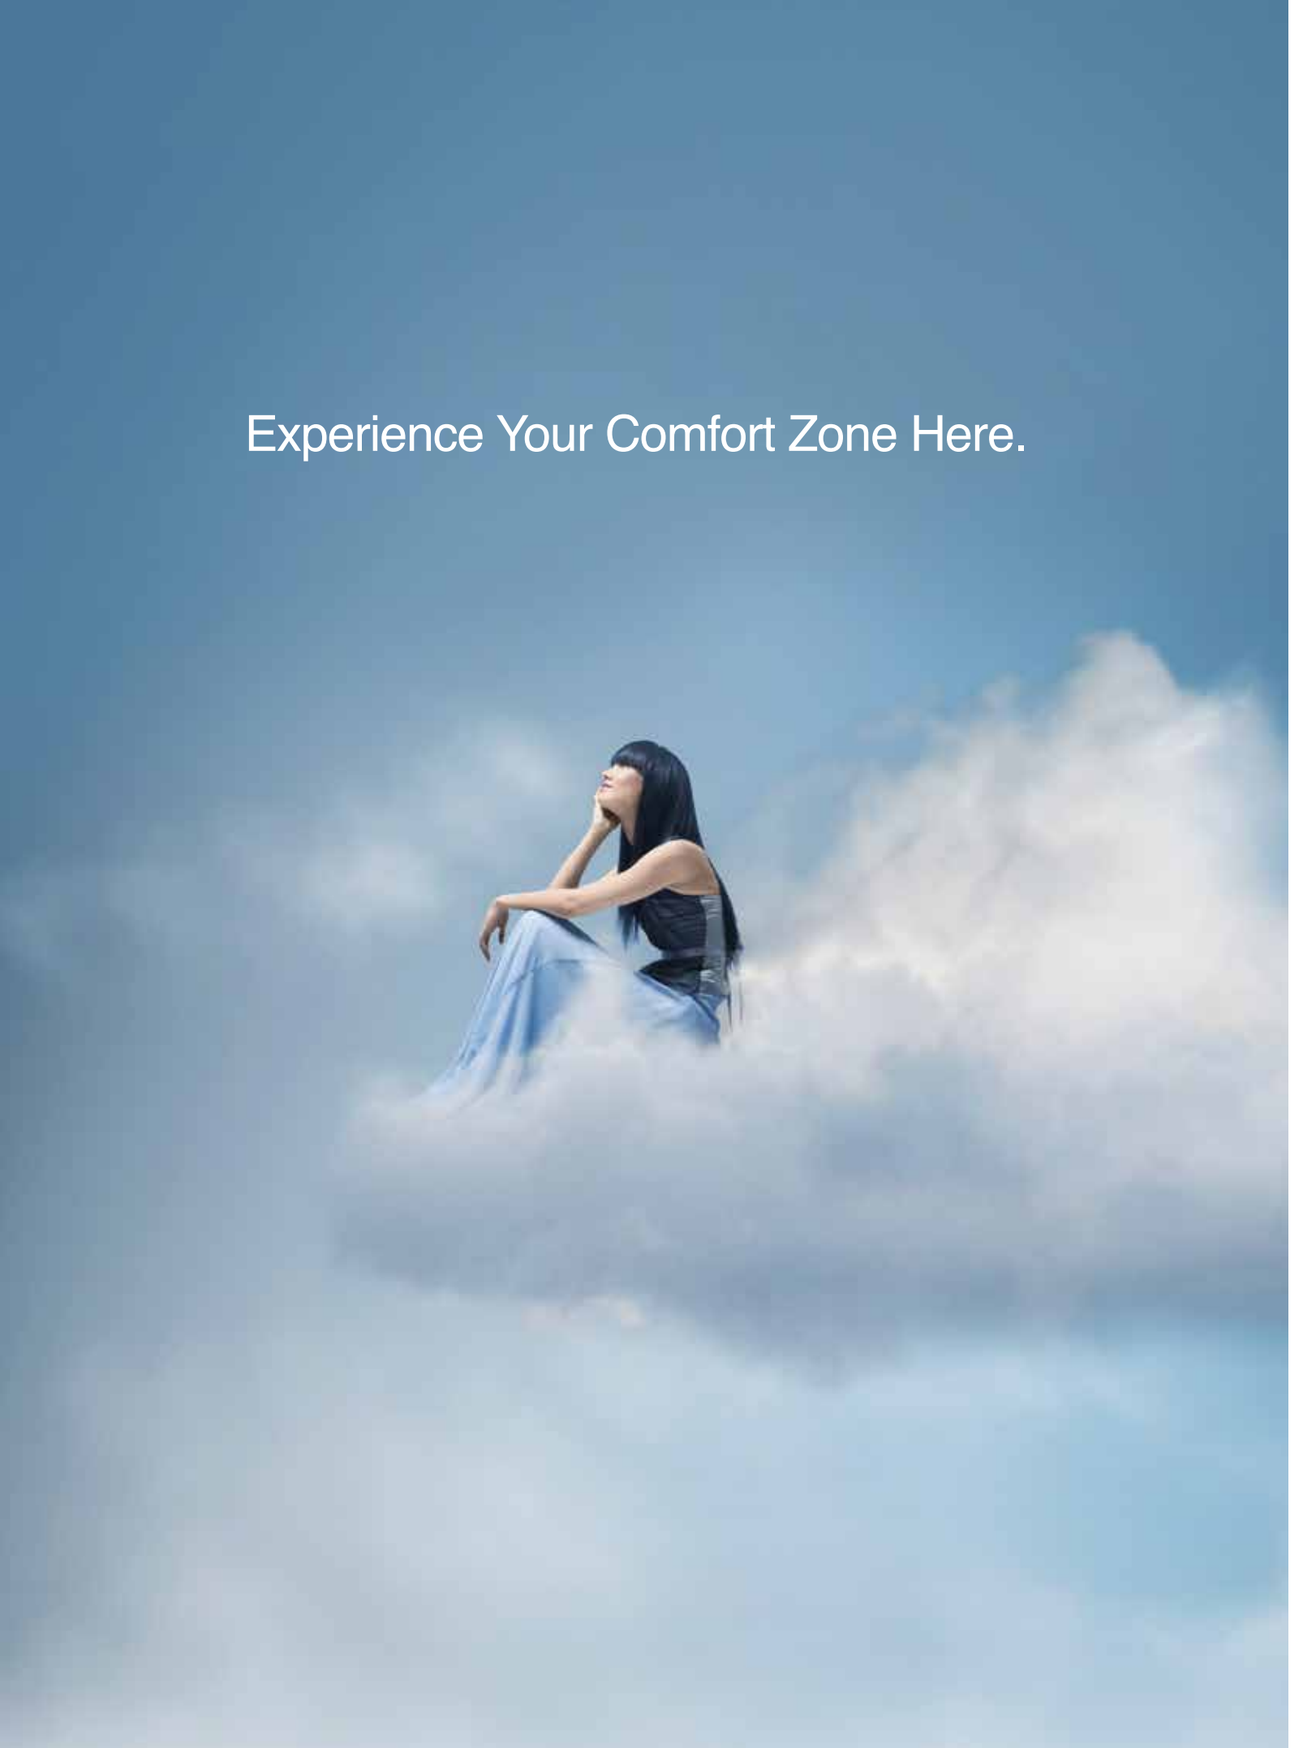
High Flushing Performance for Both Heavy and Light Waste

The trapway of the bowl fills with water from 2 side water channels and initiates a strong siphonic action to evacuate both heavy and light waste.

**Only for Neo Modern, Nobile, Milano one-piece toilets*

DUAL FLUSH

Conserving water is as important to us as it is to you. After all, the less water you use, the more water you save. Apart from efficient flushing technologies, we have a selection of toilets with Dual Flushing that will help conserve water consumption.



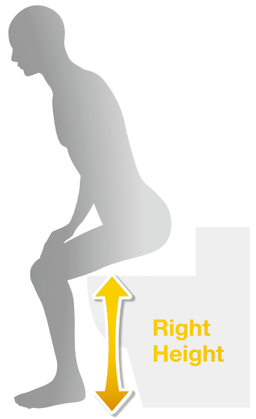
INTIMATELY ERGONOMIC, INNOVATIVELY CRAFTED.

COMFORT CURVE SEAT

Ergonomic Seat Design

Our Comfort Curve Seat ensures an ergonomic fit that comfortably contours to your body.

*Available in Acacia Evolution & Milano Collection



RIGHT HEIGHT

Makes Getting Up Much Easier

Easy to get on and off, especially for the elderly, pregnant and disabled.

*Available in Cygnet Collection

COMFORT OF MIND

Anti-bacterial Finish

American Standard is the first in the industry to meet the Japan Industrial Standard (JIS Z 2801:2010) for this anti-bacterial technology on the push button. This technology is also applied on the seat and cover to provide a more hygienic environment.

*Available in Acacia Evolution Collection

FAUCETS & SHOWERING EXCELLENCE

What is your ideal shower like? Everyone has different preferences. We take your cleansing preferences seriously. We envision shower encounters to be more than just a cleansing routine. That is why we combine thoughtful innovations with a variety of design lines to provide you with reliable performance. Wash your worries away and indulge in the perfect shower.

The pictures are for reference only.

TECHNOLOGY LEADERSHIP

Innovative Design

American Standard, working with a number of internationally famous designers, continuously launches faucets that stand at the forefront of design trends. Many of its products have won international design awards; the MOMENTS, ACTIVE and TONIC collections, for example, have won design awards including iF, RedDot and Design Plus. American Standard's long-standing commitment to innovation has led to the continual introduction of innovative and functional design. Not only does this design provide consumers with unprecedented comfort, but also makes the overall design of the bathroom even more harmonious.

- RedDot Awards - Best of Best
- iF Awards iF
- DESIGN PLUS

Long-lasting and Durable

The German-imported cartridge brings a unique feature for easy temperature control. A single lever controls the pressure and temperature within a unique comfort zone, between 30-45°C. This gives more sensitive control and provides smooth effortless handle operation even at high pressures. American Standard offers a 5-year quality guarantee for each and every faucet cartridge, continuing and enhancing our promise to provide high-quality products to our consumers. American Standard uses high-quality brass ingots and German techniques to meticulously cast the faucets, making them sturdier and longer-lasting, and giving them a brighter and more durable coating. American Standard's concealed control valves use DZR anti-corrosion copper, meaning the durability of the faucets is guaranteed even in extreme environments.

Ceramic Cartridge Technology

PVD Coating Technology

Constant Bright Coating Technology

Leading Technology

American Standard's i-Showering smart shower system is the first of its kind to use audio and video multi-media digital technology. It is quick, accurate and thermostatic, providing you with a comfortable showering experience. American Standard line sensor faucets use brand new digital sensor technology that uses the light reflected by objects to identify their shape. This avoids unnecessary sensor, and provides comprehensive and thorough improvements in reliability. With the aqua energy technology of American Standard, the faucet automatically opens when it senses a user. The water then flows through the build-in hydro-power generating device, and the energy is thus transformed into electricity and stored in the storage battery. The stored power is enough to maintain daily operation of the faucet. The American Standard Universal Installation Box features optimized concealed installation, allowing you to easily future later renovations without damaging the wall, and making the process convenient, easy and effective.

Thermostatic Technology

Line Sensor Technology

Auqa Energy Technology

Universal Installation Box

Green

A feature in single lever basin mixers that encourages water saving. The user lifts the handle until the feel a resistance, which equates to a flow rate of 50%. Lifting the handle past this CLICK enables the fitting to deliver up to full flow. The hand spray and rain shower head have advanced air-in technology, comprehensively improving the comfort of showering whilst also saving water. American Standard basin faucets and kitchen faucets use low lead techniques, making them healthier and safer to use.

Double CLICK Water Saving Technology

Oxygen-rich Rain Shower Technology

Oxygen-rich Showerhead Technology

Super Low Lead Technology

CERAMIC CARTRIDGE

American Standard: inventor of the single handle cold / hot water ceramic cartridge

American Standard ceramic cartridges are fired at 1400 Celsius degrees and then polished to within 0.2 micrometers' accuracy to ensure long-lasting durability. American Standard ceramic cartridges have been world-wide applied and the faucets have received good reputation across the world as well.

ECO Cartridge Technology

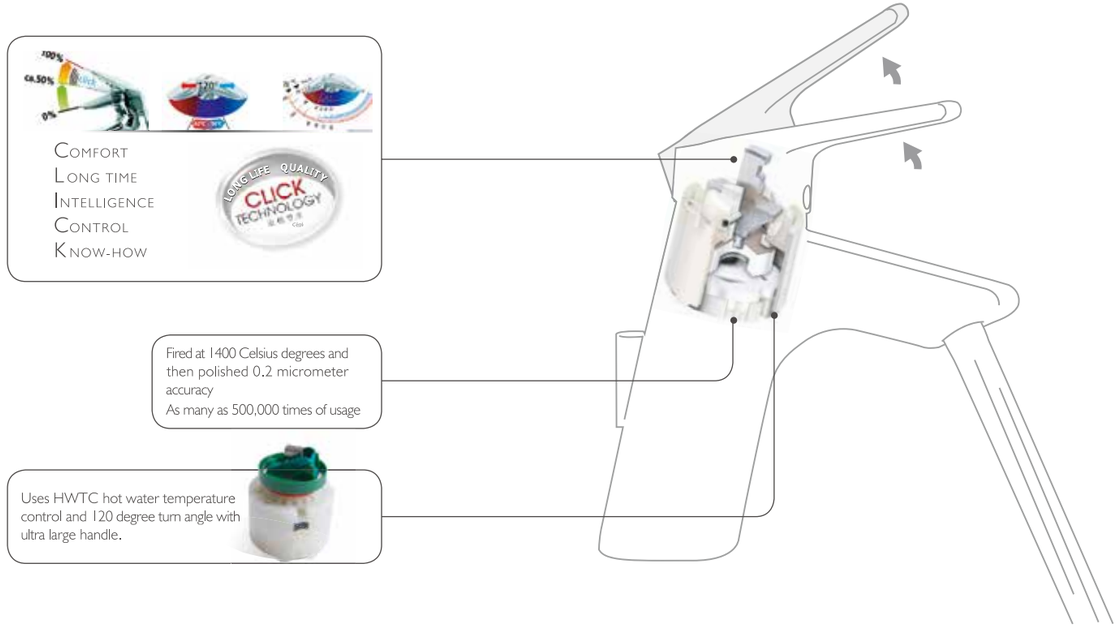
American Standard's ECO cartridge technology ensures only cold water comes out when the faucet is first turned on. This prevents repeated activation of the water heater, saving energy and protecting the water heater.

"Multiport" Cartridge Technology

The Multiport Cartridge features 3 outlets (ports) for the out going water to flow through, inside the body of the fitting.This provides a greater water flow out of the tap, in comparison to an internal cartridge with a single port (outlet). Other benefits provided by the Multiport Cartridge are easy water and temperature control and a smooth and effortless handle control.

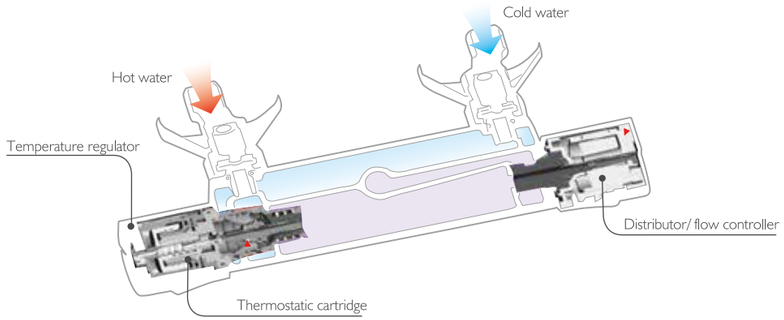
Double CLICK Water-saving Cartridge Technology

The single lever basin mixer incorporate a CLICK feature that encourages water saving-the user lifts the handle until they feel a slight resistance. This resistance informs the user that the fitting is delivering only 50% of its maximum flow potential. Lifting the handle futher enables the fitting to deliver maximum flow. The most remarkable features of the technology includes "Water Saving Variable Control" and "Hot Water Temperature Control", as well as a wider range of adjustment.



THERMOSTATIC FAUCET

The imported thermostatic valve, automatically maintains water temperature at the required setting to ensure safe usage and prevent scalding, even when water is drawn off elsewhere.



SUPER LOW-LEAD FAUCET

American Standard washbasin faucets and kitchen faucets are processed with lead extraction, guarantee a safer and healthier usage.

UNIVERSAL INSTALLATION BOX

American Standard Universal Installation Box can optimize the concealed installation so you can easily handle future renovation without damaging the wall, making the process convenient, easy and effective

Greatly saves the renovation cost
It needs only to change the control valve instead of tearing down the pipes

Symmetrical structure
Few mistakes in installation

The depth of the part in the wall can be adjusted
The adjustment range reaches 22mm, making it more convenient to install

A gradienter is contained to facilitate in adjusting the correct position during installation

Matching with nearly 20 American Standard concealed bath and shower/ shower only control valves

Equipped with moisture-proof shelf, it stops water from leaking inside and ensures that the following up renovation doesnt' damage the whole set

Switching freely between pre-flushing and seal test functions

COMMERCIAL

Commercial buildings, hotels, public buildings all over the world are looking for sustainable and well-designed solutions in their premises. Our Line Sensor faucets, for example, offer unmatched sensor precision compared to a conventional sensor faucet. Such sustainable efforts can only come with dedicated research and development, adding an ecological care from American Standard to well-known addresses.

SENSOR TECHNOLOGY

Combining advanced sensor technology and a unique, diversified design, American Standard provides comprehensive solutions for mid-range and luxury projects. At the same time as catering to the user's needs of comfort and convenience, American Standard sensor technology is the embodiment of the brand's innovation in reliable functionality and design style. It is convenient, advanced and cost-effective, fully meeting the requirements for mass installation and maintenance.

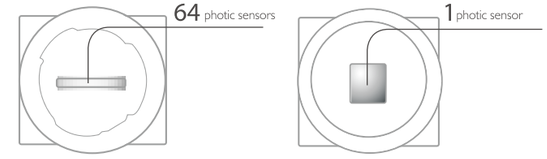
Digital Sensor Technology

- High reliability sensor technology fully prevents misoperation.
- Complete solutions for various applications and installation methods.

High reliability identifying sensor

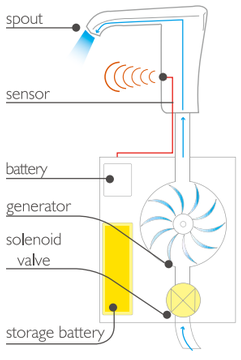
Originating from the auto-focus of digital cameras, this technology is made up of 64 sensors. It combines the intensity limits of light received by each photic sensor with the distance from the object and intensity of reflected light, allowing the sensors to detect if the reflected light is from objects such as basins or otherwise. This avoids accidental activation.

- The sensor is positioned at the spout, in compliance with use habits.
- The aerator at the spout makes the water flow more comfortable, saves water and helps to prevent splashing.



Self-generating Electricity Sensor Faucet Technology

The faucet opens automatically when it detects the user. The water stream flows through the built-in hydraulic generator, which converts energy into electricity and stores it in the storage battery. The electricity in the storage battery is enough for daily use of the faucet, and the amount
of electricity generated increases in direct proportion to the frequency with which the faucet is used.



- Reducing use costs
  There is no need to replace the battery, reducing day-to-day maintenance costs.
- Protecting the environment
  The hydropower reduces the use of batteries, which helps avoid damage to the environment caused by used batteries.
- Ultra water-saving
  Saves over 50% more water than regular faucets.
- Accurate and reliable induction
  Imported control parts accurately control operation.

Selectronic Proximity

- Universal Sensor
  The universal sensor helps cut reserves and reduce the time spent on maintenance.
  The universal sensor matches with all sensor faucets and other sensor products.
  The sensor area and running time can be adjusted without the help of any tools.
  The sensors' small size makes installation easy, and their waterproof design delivers reliable performance.
- Screen Out Potential Problems
  Filter cap containing proprietary technology to remove impurities and prolong the service life of the solenoid valve.
  Stainless steel filter screen prevents the accumulation of impurities and reduces maintenance costs.
  Integrated filter cap guarantees a clean faucet for longer and reduces the need for regular maintenance.
- Multi AC Connection
  Multi AC Connection can be connected to 3 sensor faucets and parallel connection ensures that every sensor faucet can be used safely.
  The planning and design are simplified to reduce the cost.
  In the event of a power failure, the integrated backup power guarantees there is sufficient power to shut down the solenoid valve.

Matching rate of flush valve and urinal

WELLNESS TUBS & SHOWER ENCLOSURES

We hold utmost respect for the essential element - water. After all, it is the core of our business. We believe in harnessing the best of this element to deliver comfort for the body and mind. American Standard bathtubs are designed for absolute relaxation. Immerse yourself in total relaxation as you choose from wellness tubs with, whirlpools and airpool tubs.

Wellness Tub

Hydromassage

Warm and abundent bubbles massage the body to stimulate and enrich cutaneous sensation, accelerate blood circulation and relax the whole body. With function of whirpool jets and blowers working together to pump air and streams from the sides of the tub, the benefits of hydromassage are maximized to relieve fatigue. Stream of the water is adjustable.

Bubble Massage

Warm and abundent bubbles massage the body to stimulate and enrich cutaneous sensation, accelerate blood circulation and relax the whole body.

Chromotherapy

Chromotheraphy is the ancient art of colour therapy.This integrative medicine based on traditional methods uses colours to create harmony of body and psyche.Vitality is restored.

Self-cleaning

When the self-cleaning mode is activated, the cleaning circulation system will automatically sterilize the inner surface of the pipe and bathtub surface.

Dry Massage

The small rubber hammer under the silica gel cover provides two modes of massage: continuous rotation or pulse vibration, gently massaging and stimulating your skin.

Concept

Cygnet

Concept
Cygnet

Combining soaking, massage and health care functions, American Standard Concept and Cygnet massage bathtubs are delivering a new style. The simple yet fashionable style and perfect ergonomic design bring you supreme sensation.
The ultra-deep 1.5M and 1.7M bathtubs come in various widths, allowing you to bathe in a natural and relaxed posture. Your body will be stretched and relaxed to the ultimate degree when completely soaked in water.
To satisfy the different needs of consumers, the Concept bathtub and Cygnet bathtub can both be gradually upgraded to high-end equipment from the very basic model. More user-friendly equipment such as foot massage, waist massage, chromotherapy, ozone SPA and heating system can be added as you wish to provide the ultimate flexibility, comfort and freedom in your bathroom experience.
The comfortable-feeling neck pillow relaxes your head; LED lights create a special atmosphere that stimulates your metabolism and makes you feel refreshed; the ozone SPA not only cleans your skin, but helps to improve the condition of the organs and body system; the heating system brings you the pleasure of a SPA even in winter.

Ultra-deep bathtub design

Satisfying the need to soak the whole body in the water to the utmost extent for complete relax.

Multiple hydromassage systems

Multiple hydraulic massage systems are available: regular side hydromassage, foot massage and waist massage.

Bathtub with perfect ergonoic design

Designs such as waist support, arm rest and bathtub-edge water return provide greater comfort when bathing.

Waist massage

Massage and physiotherapy for the foot bottom

Waist massage

With the help of comfortable waist support and arm rest design, the waist massage fully helps the waist to relax.

360° water jet

360° angle adjustable massage nozzle

Angle-adjustable hydromassage nozzle provides powerful water streams from both sides, stimulating the deeper skin layer and muscles and relieving body.

Double rotating massage nozzle

Double rotating water streams fully massage the foot as well as the acupoints and meridians on feet and waist.

Double whirl rotating

DIY

Above two types of nozzles are switchable as wishes. The mix of stream and air amount is adjustable as well.

Electronic control panel

The full-featured model is equipped with an electronic control panel which seperately controls the hydromassage system, heating system, ozone system and chromo therapy system, and can easily switchbetween different systems.

Handrails, bath pillows and shelves

Handrails, bath pillows and shelves are available to help increase the comfort of bath and satisfy your various bathing habits.

Tub Artificial & Shining Stone Features

Artificial Stone Bathtubs

- Touches fine and smooth.
- Solid, durable and not easy to tarnish.
- Easy-to-clean,bacterial-proof due to unique natural mineral ingredient.
- Luxury, premium material and design.

Shining Stone Bathtubs

- Selected materials and special structure deliver good heat preservation and heat resistance feature which is better than the industry standard.
- Fresh and bright surface has high-end pearly luster on it.
- It is easily repaired through polishing, and long-lasting.
- It is designed according to the shape of hammock, which has wide space and gives you ease.
- Multiple colors for customization to satisfy various needs.
- Light and solid, it is convenient to install.

Multiple colors available:

White CWI | Black CBKI | Pink CPI | Blue CLBI

Long lifespan

High-end materials, hot water resistant resin and FRP hot water resistant reinforced guard against distortion or bubbles after being tested for 750 hours in 80℃ water. The standard is 7.5 times higher than industry standard

Unique structure
Unique 4-layer structure for better warmth preservation
Sturdy and durable

Transparent layer on the surface (macromolecule resin layer)
Hot water resistant resin layer
FRP hot water resistant reinforced layer
FRP reinforced layer

Unique shape

Pearly surface luster delivers high-quality appearance.

Easy to repair

Original condition can be restored through polishing

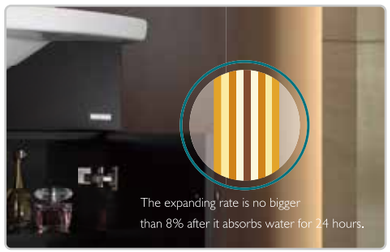
Technology briefing

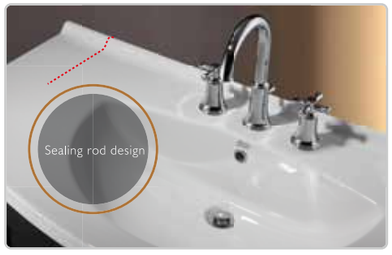
American Standard furniture integrates top quality and innovative design concept, brightening your bathroom. Various appearances, high-quality metals, practical storage concept and rich decorative finishing create personalized bathroom space for you.



Outstanding Humidity Resistance Performance

Thick paint coating protects the base material. Multi-layer solid wood board is highly humidity resistant.

Stable and multi-layer solid wood board does not distort in humid environment. High-quality decorative finishing well protects the base material from being eroded by the humidity in bathroom.



Long-Lasting And Durable

Refined ceramic glazing is long-lasting and durable

Metal accessories meeting international quality standard is rust and mould resistant with easy use and reduced noise. The exquisite technique and strict monitoring assures the quality.

All-Round Strong Capacity Of Storage

Adjustable cabinet clapboard

Ultra-large cabinet and flexible clapboard design satisfies various day-to-day storage needs, displaying the user-friendly design. Practical countertop design adds to the storage function of the product. Delicate design of the cabinet door angles makes it more convenient for storing everyday objects and saves bathroom space.

Healthy And Environment-Friendly Quality

Formaldehyde release amount≤ 1.5mg/L

The formaldehyde release amount meets European E1 standard. The cabinet paint reaches national standard of environmental protection, and there is no need to worry about hazardous substances such as benzene.
